Certificate

Changzhou Dome Abrasives Manufacture Co.,Ltd

An abrasive manufacturer you can trust

Dome Abrasives was established and registered in 2001. We have more than 24 years experience in developing and manufacturing resin bond cutting and grinding wheels.

We now have nearly 100 sets of production equipment and a modern production workshop covering an area of 20,000 square meters, which can fully meet your needs.

As a star company, all our products have passed ISO9001, MPA, CE, BSCI certificate and EN12413 standard. Dome has always been committed to providing customers with cost-effective products and has won the praise of users for its continuous innovation and excellent customer service. We export to the South America, Middle East, Southeast Asia, Europe and America, etc., and our products are all over the world.

Dome ambition is to become one of the leading market share holder in the most competitive Market in the world today.

"Customer' s goal and satisfactions are our first priority."

DOME Website

You will receive more information on the CNDOME brand here or at www.czdome.com

Colour coding for the four product lines

Abrasive

A	Aluminium Oxide
GC	Green Silicon Carbide
C	Black Silicon Carbide
WA	White Aluminium Oxide
ZA	Zirconia

Grade

H-K	soft
L-I	medium
P-S	hard
T-Z	very hard

Grain Size

16-24	coarse
30-60	medium
70-220	fine-medium

Bond

BF	Resin bonded
Fibre	reinforced, woven or non-woven

Safety Recommendations

-  Not approved for side grinding!
-  Wear protective gloves!
-  Observe safety recommendations!
-  Wear protective goggles!
-  Wear dust respirator!
-  Wear ear protectors!

Grinding safety

Abrasive manufacturers, machine producers and users all contribute to grinding safety. DOME abrasives are built to meet the prescribed safety codes. However, the user is responsible for proper handling of the abrasive drive and correct use and application of the grinding abrasives.

Metal ring with validity date

Example:

V01/2024 indicates production in January of 2021 and advised usage before January of 2024

Fiberglass net

Tolerance range of OD<1mm, tolerance rang of ID<0.5mm.

Above mentioned sizes are common spcifications, special sizes can be produced according to customers requirement with OD range 32~1300mm and ID range 7~130mm.

Dimensions and shape

The diameter, thickness and center hole size and their meanings are shown in the figure:

A(=Diameter), B(=Thickness), C(=Arbor)

Never use two flanges that have different diameters for cutting and grinding, must be assured that the two flanges have the same diameters and support areas.

Correct

Incorrect

Cutting disc

Full size cutting disc

- Very long durability
- Easy working
- Cost effective
- Less heat generated
- Less noise
- Minimal burrs on the surface

Application

- Stainless steel/INOX
- High alloy special steel
- Angular steel profiles
- Very solid construction steel
- Iron
- Solid steel bar
- Unalloyed and alloyed construction steel

EN12413

· Ultra-thin cutting disc ★★★★★

- Ultra thin design
- Precision cutting
- Top raw materials
- Excellent stock removal rate
- Optimum efficiency
- Over 30% more service-life

Application

- Stainless steel/INOX
- Steel tube
- Iron
- Solid steel bar
- Angle steel
- Structural steel

EN12413

Ultra-thin cutting disc

Multifunctional cutting and grinding disc

- Combines cutting and grinding functions
- Excellent performance
- Top raw materials
- Cost effective

Application

- Stainless steel/INOX
- Iron
- Welding seams
- Angular steel profiles
- High alloy special steel
- Solid steel bar
- Very solid construction steel
- Unalloyed and alloyed construction steel

· Rail cutting disc ★★★★★

- Specially designed for railway construction
- Stable performance in any operating environment

Application

- Suitable for most types of gasoline saws on the market
- Widely used for cutting 60 and 75 rails

EN12413

Rail cutting disc

Grinding disc

Full size grinding disc

- High performance aluminum oxide grain for long life and high material removal
- Low vibration design ensures operator convenience and longer usage
- Triple fiberglass reinforcement provides added strength for aggressive stock removal

Application

- Stainless steel/INOX
- Tool steel
- Welding seams
- Non-ferrous metals
- High alloy special steel
- Sheet steel
- Very solid construction steel
- Unalloyed and alloyed construction steel

Flap Disc

Full size flap disc

- Adopt high-standard fiberglass cover to ensure efficient and safe operation at high speeds
- High-quality sandpapers bring more stable and efficient grinding
- Excellent at a variety of tasks including surface blending, beveling, grinding, deburring, edge chamfering, finishing, deburring and rust removal

Cover

- Plastic cover
- Mesh cover
- Iron cover
- Nylon cover

Abrasive

- Aluminum oxide
- Zirconia

EN12413

Type27

- Ideal working angle of less than 15°

Type29

- Ideal working angle of 15°-35°

Mini model ★★★★★

- The 2-inch and 3-inch small models are very popular in DIY and small space operations
- Suitable for various handheld small angle grinders, easy to operate
- High-quality raw materials also give them powerful cutting and grinding capabilities

Application

- Stainless steel/INOX
- Iron
- Welding seams
- Angular steel profiles
- High alloy special steel
- Solid steel bar
- Very solid construction steel
- Unalloyed and alloyed construction steel
